**Subject:** Agreement: 6th update of the RAT common list and publication of the common list of lab-based assays  
**Attachments:** Addendum to the 6th update of RAT common list\_201021.pdf; HSC\_Common RAT list\_AGREED 6th update\_201021.pdf; HSC\_Common RAT list\_AGREED 6th update\_201021\_tc.docx

Dear members of the HSC,  
Dear colleagues,

This morning, the HSC reached agreement (in writing) regarding the **6<sup>th</sup> update of the EU common list of rapid antigen tests** as well as the content of the **first publication of the EU common list of lab-based antigenic assays**.

Attached you will find the final documents, setting out the inclusion of 20 new RATs, the removal of 2 RATs, and the inclusion of 2 lab-based antigenic assays. These were all assessed against the new criteria as agreed by the TWG on 21 September 2021. We have also attached the document in track changes for ease of reference, as this will allow you to quickly see which tests were added and which ones were removed. The document in track changes also sets out the pending issues (points that will be addressed by the TWG for the next review and update).

The documents will soon be published on the dedicated website [Technical working group on COVID-19 diagnostic tests | Public Health \(europa.eu\)](#) and the JRC database is expected to be updated and aligned as of tomorrow.

Kind regards,  
HSC Secretariat
