[REDACTED] call on semiconductors

Dear [REDACTED],

Thanks so much for your response.

[REDACTED], in copy, will be in touch to find a suitable slot for the call, most likely in the week of 8 November.

Best

Lucia

Lucia

Thank you for your enquiry which has been forwarded to me as head of Public Affairs for Stellantis Europe. I would be very pleased to arrange a call to discuss semi-conductors and to include some of our specialists in this call in order to provide concrete examples, perhaps you could propose some times next week?

In preparation for our call we will prepare responses to the questions set out in your earlier email to Mr [REDACTED].

Regards

Dear both

We are trying to reach out to Stellantis concerning the below but without success at this stage.

Could you please let us know whether you have received our email and whether someone from Stellantis would be available for a call concerning semi-conductors?

Thanks in advance

Lucia

Dear Mr [REDACTED],

My name is Lucia Bonova and I am a member of the Cabinet of executive vice-president of the European Commission, Margrethe Vestager. I am contacting you as we are reflecting upon the current situation concerning the shortage of semiconductors in Europe and the steps we could take in that respect.

As automotive industry has been particularly affected by this situation we would be interested in engaging with stakeholders to better understand the situation and the needs of the industry.

In particular, we would be interested to discuss the following issues:

- What are the causes of the current semiconductor shortage and what are mitigating measures that can be taken in the short-term by the suppliers but also by the customers?
- What is in your view the business case for semiconductor R&D and production in Europe and what type of semi-conductors should ideally be produced locally?
- What are your concrete needs now and in the medium term in terms of technological specifications. Do you see demand for cutting edge 2nm semi-conductors amongst the automotive industry in the medium to long term?

- Do you see risk of medium to long-term overcapacity in view of the multitude of announcements for new facilities in the US, Singapore, Japan etc. ?
- Which companies have the capabilities to satisfy your demands in the medium to long-term?

I am conscious that you might not be the right person within your company but would greatly appreciate it if you could direct me to the right people.

Thank you in advance and I look forward hearing from you.

Best regards,

Lucia
