Energy security // We need to implement energy carriers now.

Suitable locations to cover both the north- and south of Europe with clean energy storage. Could specify possible EEZ locations upon request. Norway, Denmark, France, Portugal, Spain, Italy, Turkey.

Attached an overview on our pre-project analysis. Full report will be available within Easter. We use mature technology, but we need to adapt and implement in a development phase. We are ready to go full scale if we can set a consortium with cooperation within EU. EU can provide all elements of tech in the project as of today.

Please advice if more information is desired.

Thank you!

Best Regards

**OKER ENERGY AS**
