Subject: Our exchange / Solar contribution to current crisis
Attachments: SPE for Agora_ Solar PV development_20220307.pdf

Dear [REDACTED],
Thanks for letting me know. 15/03 is now in my agenda.

Dear Kurt,
Given the urgency, I wanted to share with you our analysis on raised ambition in our sector. It is based on the 5y market outlook we are publishing yearly. Given its versatility and the possibility of fast deployment, solar can contribute to the energy crisis in a relatively short timeframe.
In the slides attached, I want to draw your attention in particular to the fact that solar development has been very much underestimated by the European Commission (see slide 7). The level of ambition the Commission is currently looking at is therefore not matching what we already see happening in Europe.
Happy to discuss further – hopefully next week.
Kind regards,
[REDACTED]

Subject: RE: Solar roasted coffee exchange

Dear [REDACTED],
Kurt will have to travel to Strasbourg, which is why I have to cancel tomorrow morning's coffee once more.
It would work for him next week on Tuesday (15/03) morning at 8h30 or on Tuesday (22/03) also at 8h30.
My sincere apologies for yet another change of schedule.
Kind regards,
[REDACTED]

Dear [REDACTED],
no problem. 8 March also works for me.
Kind regards,
[REDACTED]

Dear [REDACTED],
I'm afraid I have to postpone the coffee with Kurt on Tuesday as he has to attend a meeting with our Head of Cabinet.
I can propose following (new) dates : 8 and 15 March (14 and 18 do not work anymore).
Kind regards,
[REDACTED]

Dear [REDACTED],
Thanks for the proposals. 1st of March also works well on my side.
Looking forward!

Dear Ms [REDACTED],
Kurt would be delighted to taste a solar roasted coffee in your new offices on RP Schuman in the next few weeks.
Following dates seem (at the moment) feasible :

1, 14 or 18 March, at 8h30.

Would one of those slots be possible for you ?

If not, please feel free to propose a few dates. I'll see whether I can adapt Kurt's schedule a bit.

Have a lovely day,

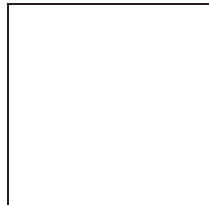

[REDACTED]

Dear Kurt,

Thanks for your reply to the invitation below. I do understand your agenda constraints on the proposed dates.

It would be great though if we could meet in the next weeks at your convenience to discuss the topics mentioned. I would be very happy to also welcoming you in our new offices on Rond Point Schuman, offering you a [solar roasted coffee](#).

Kind regards,

[REDACTED]

Subject: Invitation: Solar CEO meeting - 30 March / Letter of support on European Solar Manufacturing

Dear Kurt,

I hope you are doing well!

It has been some time that we exchanged on the developments in the solar sector. I am reaching out to you as we are organising our first "CEO EU Solar Resort", bringing together CEOs of major European solar companies to discuss how solar can be further boosted contributing to the Green Deal.

One item on the agenda is also the re-establishment of solar manufacturing in Europe. We would like to discuss **solar manufacturing in Europe over lunch on 30 March, 12:00-13:30h**. Given the links to the semiconductor business the European Union is supporting and the strategic importance of having green technology like solar being produced in Europe it would be great if you could join us for the lunch and discuss with solar business leaders (both project developers and manufacturers). For your information I am attaching a letter which has recently been signed by major European solar offtakers asking the Commission to push for European manufacturing.

Commissioner Kadri Simson already confirmed her presence to one part of the discussion on 30 March. We also have to date 10 CEOs of leading solar companies in Europe confirmed.

Please find enclosed the invitation. It would be a great pleasure welcoming you!

Kind regards,
