Subject: Invitation Panelist 12. October - Zero emission trucks and buses – Invitation to panel discussion keeping today's and tomorrow's world moving

Dear Mr. Mes,

In view of the upcoming revision of the CO2 regulation for trucks and buses we are organizing a high-level event on the 12th of October together with [REDACTED] Mercedes-Benz Trucks and [REDACTED] Daimler Buses.

Our industry is transforming at high-speed to achieve a goal that unites society, industry and politics globally: to fight climate change.

As one of the world's leading truck and bus companies, we feel it is our responsibility to drive this transformation forward as quickly as possible. Our ambition is very clear; having CO₂-neutral transport on the road in Europe by 2039 is our ultimate goal. To succeed, we need to bring many things together – not only zero emission products, but also a suitable charging infrastructure, planning certainty for our customers, and much more. It is a joint effort of industry and politics.

We would like to discuss these challenges and opportunities in depth with key stakeholders from industry and politics during an event in Brussels at Autoworld. It will take place from **4pm to 7.30pm** and there we would also showcase our zero emission vehicles.

The **panel discussion** is scheduled from **17H15**, followed by a cocktail reception and the opportunity to see our zero-emission vehicles live and get in-depth explanation on the different technologies, i.e. battery electric and hydrogen.

We would like to invite you to join us **as a panelist**. Your expertise and input would be highly appreciated for an interesting panel discussion.

Please do not hesitate to get back to me for any further details.

We are looking forward to hearing from you.

Kindest regards,
