**Subject:** Request for a meeting: CO2 for HDV

Dear Mr [REDACTED],

I am reaching out in the context of the proposal for a revision of the CO2 emissions standards for heavy duty vehicles.

Our members have recently finalised our position paper (which you find in the attachment). We focussed at this stage on technical considerations which are relevant to achieve possible targets in the regulation, such as TCO, framework conditions such as infrastructure but also available technologies.

As CLEPA, together with a delegation of members, would be glad to present the key considerations and discuss your views on the main parameters of the upcoming regulation.

Please let me know when a meeting would be possible for you. Looking forward to your reply.

Best regards,

[REDACTED]
