By E-mail:

Dear [REDACTED],

Thank you for your message of 4 May 2022 to Stefanie Hiesinger, Member of Cabinet of Executive Vice President Timmermans, on the methodology for determining greenhouse gas emission savings of renewable fuels of non-biological origin and recycled carbon fuels. I have been asked to reply on her behalf.

I appreciate your engagement on this matter and have read your input with interest.

The Commission published on 20 May a draft of the delegated act¹, which sets out a methodology for determining the emissions savings of renewable fuels of non-biological origin and recycled carbon fuels based on a robust life cycle assessment approach.

Following the end of the consultation period on 17 June 2022, the Commission is working on the final draft of the delegated act that will be proposed to the European Parliament and the Council, who will have two months to accept or to object to the Commission's proposal, before it may enter into force.

I thank you for your constructive input and welcome your continued engagement on this matter.

Yours sincerely,
