Dear all,

Please find below a short flash of the meeting with A4A.

A4A wished to discuss three main topics:
- Non-co2 MRV
- Label
- SAF accounting

Non-CO2: US airlines are supportive of better understanding the impacts on non-CO2 and looking at mitigation options. A4A is particularly worried on the modelling exercise and relying on default values. A4A also recalled the applicability of the Thune bill to US operators. MOVE recalled that DG CLIMA is in the lead and that there will be an OPC for comments.

Label: A4A concerns that it will lead to a distortion of competition. Similarly, MOVE advised to express comments on the upcoming 4 weeks OPC.

On SAF accounting: A4A underlined the importance of a registry to avoid double counting. MOVE recalled the role of the UDB.

Kr,
