**Subject:** RE: Request of [REDACTED] for access to ADONIS metadata of documents

Dear [REDACTED],

thank you for coming back on this issue.

In fact, it is the [REDACTED] 2014/679 request concerning the ARES-database, where we are confronted with the similar question,

whether the Meta-data of identified documents in this database are to be considered as separate documents, that can or have to be released.

The second request is [REDACTED] 2014/1753, concerning one single document in ADONIS.

Pls find attached the part of the confirmatory decision dealing with this aspect (I am still working on the other parts).

[REDACTED]

[REDACTED] I highlighted the relevant part.

My draft is in German and I hope you can read it. If [REDACTED] needs translation, I suggest to pass by on Monday at his office.

Regards

[REDACTED]
