Meeting organized at the request of Citibank to discuss the EU approach to regulatory issues in FS. [ART. 4.1b] presented their sense of the political climate in the US as regards regulatory issues in financial services: concerns on the Hill that the EU proposal could undo Dodd-Frank, House and Means Committee is more favourable, whereas Banking Committee is sceptical, Treasury continues to oppose. There is no single view on this issue among democrats. The ones, which were involved in the preparation of Dodd-Frank (E. Warren) would oppose, whereas the others are not negative. [
