Subject: PPB Meeting with the European Generic Medicines Association

Today, Peter Balas had a meeting with [ART. 4.1b], and [ART. 4.1b], EGA (European Generic Medicines Association).

[NOT RELEVANT]

The key priorities for EGA are the TTIP, [NOT RELEVANT] and [NOT RELEVANT]

On the TTIP, the main offensive issues are: the set-up of a regulatory framework allowing single EU/US development programmes for biosimilar and generic products; mutual recognition for compliance inspections; a regulatory framework allowing advance manufacturing; and recognition of different but the highest worldwide IPR protection system in the EU and the US without any attempt to harmonise it in all aspects.
