

23/06/2015 TTIP - Energy Efficiency

TABC, Electrolux, Johnson Controls

TRADE

Meeting was organised with TABC representatives of the energy efficiency sub-group to follow up on the discussion earlier this year on how to potentially address energy efficiency in TTIP.

TABC has been working on their position for some time and the sub-group is now finalizing its position paper on the subject, which they are expecting to submit before the July round. If adopted, it would present the position of all TABC members.
