Dear [REDACTED],

I have tried to incorporate the suggestions of DDG Strohmeier in the briefing, see attached. Will this be sufficient?

I talked to the colleague responsible for the ILUC file in DG CLIMA and he assured me that the animal feed by-products of first generation biofuels are taken into account in the modelling, i.e. first generation biofuels are given 'land saving' credit when there is a valuable by-product.

Kind regards,

[REDACTED]

Your document was refused by the hierarchy for the request 1514.

be more prudent on ILUC which is not yet adopted by the College! See in this respect my comments on the background doc.
