Subject: Keynote speaker at a conference on storage at Bocconi University
Importance: High

Dear Mr Nociar,

I am the director of the Master in energy and environment (called MaGER) at Bocconi University in Milan (more info [here](#)). I am currently organizing an international conference on energy storage, in cooperation with our Centre for Research on Energy and Environmental Economics and Policy (called IEFE) and Societe Generale. The date is **07th June 2016, in the morning**. Please find attached herewith a draft program. As you can see there will be two sessions: the first one will be dedicated to a series of presentations on the economics of storage from senior academics, coming from different European countries; in the second session instead there will be a roundtable, consisting of CEOs and senior executives from key industry stakeholders (e.g. the CEO of Enel Green Power).

The reason I am contacting you is because I was hoping that Mr Šefčovič (or a senior officer from his team) might be willing to deliver the keynote speech at the conference and help us understand the role that energy storage might play in the Energy Union.

At the end of the conference, we will organize a private lunch with all the speakers.

In order to provide you with an example of the kind of annual energy conference that I organize once a year at Bocconi, please find attached herewith the program from last year.

I look forward to hearing from you

Thank you for your cooperation

Best wishes

Matteo Di Castelnuovo
