Dear Commissioner,

Thank you very much for the fruitful exchange we had with you over dinner in Luxembourg earlier this month. As you suggested, we have prepared 10 one-page notes on our priorities for the post-2020 regulatory framework.

The 1st note shows how wind energy contributes to **jobs and growth** in the EU and how we can help make Europe no. 1 in renewables.

1. [A strategic industry for the EU](#)

The following 5 notes cover key points of detail in the **Renewable Energy Directive**. They all include suggested legal text in an annex, except for the last one on finance.

2. [National benchmarks](#)
3. [Support schemes](#)
4. [Investment protection and prevention of retroactive changes](#)
5. [Repowering](#)
6. [A dedicated renewables finance instrument](#)

We've also prepared 3 notes on key aspects of **Market Design**. They all include suggested legal text.

7. [A market design fit for renewables](#)
8. [Priority dispatch and curtailment rules](#)
9. [System adequacy assessment](#)

Finally, although it's not part of the upcoming legislation, here is a note on wind industry priorities for **research and innovation** (R&I) and principles to follow when allocating R&I funding.

10. [Research and Innovation](#)

We hope this will be of use to you and look forward to our continued dialogue.

Kind regards,

[REDACTED]@windeurope.org
