**Attachments:** KD18\_QPR4\_2017\_v0\_1\_20180124\_d1 WV.docx

Dear Paul/[REDACTED]

Please find enclosed my progress on EEA work in the last three months of 2017 (QPR4), indicating the delay in Cd dynamic modelling work in view of the ongoing discussions with [REDACTED] University and the sensitivity of the results in view of policy making.

Meanwhile you came to a consensus Paul with [REDACTED] last week. Can you inform [REDACTED] about this and possibly update QPR4 in view of this agreement

Best regards

[REDACTED]

**Subject:** RE: QPR4; follow up for ETC-ULS

Dear [REDACTED]

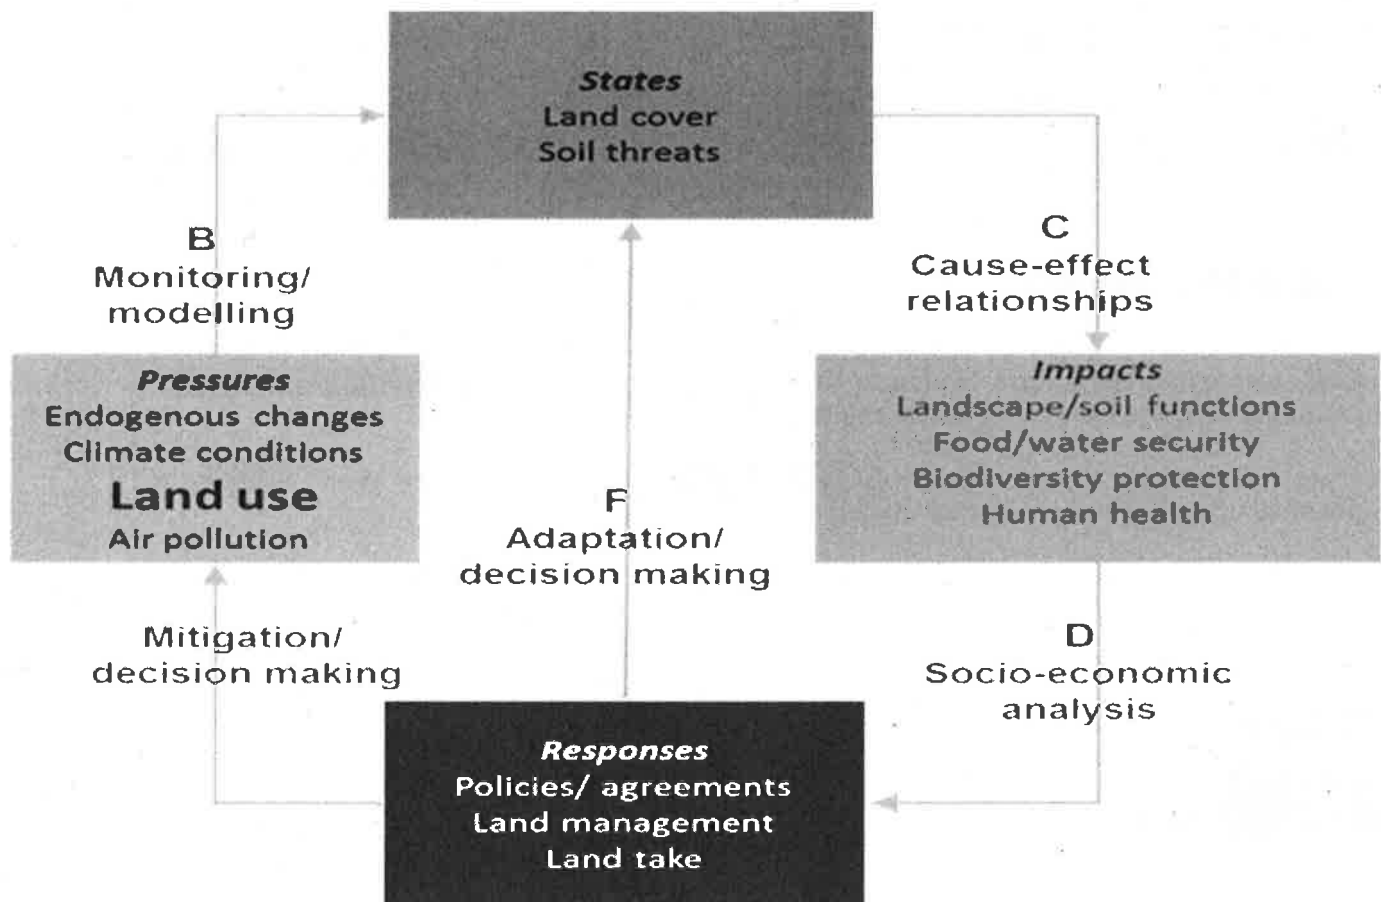

Please find enclosed my update (in track changes) on Task 1.8.2.1 in QPR4 (comments are welcome)

Below some idea on follow up for ETC-ULS as you brainstormed on it

Best regards

Wim

NB : I thought of follow up for ETC-ULS from 2019-2021. Is it an idea to mention the overall idea by presenting the topics within the context of a DPSIR systems approach as described in the figure below. This is then part of a DPSIR diagram (D=drivers is not part of the topic) so PSIR and then related to the work of ETC-ULS

With respect to soil, the idea would then be to have follow up work on (i) carbon, nutrient and contaminants (1.8.2.1) and soil degradation (1.8.2.2) in the linkage Land management-----> soil threats -----> soil functions with focus on

- Crop production (food security)
- Food quality and groundwater quality (human health): links to filter/buffer function
- Biodiversity protection

Dear all,

Please find attached the draft template for the QPR4

Please update the yellow marked lines and add the links.  
Do not forget also to add your travels under ETC/ULS.

Please provide your input till the 09.02.

Best
