Dear NIS team,

I was wondering if you could forward the following message to the cooperation group:

Thank you for your help!

Dear all,

I'm happy to inform you that the Finnish Government has submitted to the parliament a proposal for national implementation of NIS directive on 19th of December. The proposal can be found here (in Finnish and Swedish) http://valtioneuvosto.fi/paatokset/paatokset?decisionId=0900908_8057a85c.

I would like to also share with all of you a translated summary of the proposals including a short summary, a description of identification of essential services and legislative proposals. Please notice that this document is an unofficial English summary for the information sharing purposes only. According to the article 5 subparagraph 4 and 6 of the NIS directive, we would like to consult the member states on the identification of essential services. I will be presenting our proposals more in detail in the next co-operation group meeting and will be happy to answer all your possible questions,

Have a nice weekend and see you all soon,

Best regards
