Good afternoon,

Can I check if the email below will be picked up by your department?

Some action would indeed be needed.

Best regards,

Subject: Publication on EC Website Mobility and Transport about FCH-JU

Dear all,

I discovered today an update of even pretty new European Website about Hydrogen and FCH-JU activities launched at Transport and Mobility (follow the links attached). Not sure about the given content, but some links given there are really bad links and guiding to websites either none existing or websites which could get bought or even something different! This will not be in our common interest and should get reviewed as soon as possible by one of our experts and NERGHY, PO or HE.
