**Subject:** our meeting on Friday 15th

Dear Ms. Commissioner Bulc,

Thanks again for the meeting we had last Friday. It was extremely helpful for us, both industry and research to understand where, in your own views, our hydrogen and fuel cells ecosystem stands.

We fully noted the need to give a higher visibility to hydrogen and fuel cells amongst other alternative powertrains technologies. In this endeavor the principle of "technology neutral" systematically implemented as a golden rule by the European Commission will be extremely valuable.

Thanks also for your kind words and appreciation of what we have achieved with your support over the past 10 years! We appreciate your efforts to increase funding for the decarbonisation of mobility using different tools and will be engaged in that process.

We also noted carefully that you are looking into the acceleration of greening maritime applications and look forward to present to you new pathways hopefully already during the conference in April in Vienna you mentioned.

As a follow-up :

- Please find enclosed as promised the short note we prepared for our meeting together with the Memorandum of Understanding signed with EGVIA (European Green Vehicles Initiative Association)
- [REDACTED], our Secretary General, will be in contact with your team members, notably as regards the interaction with the different events with cities. You can reach him at [REDACTED] and at [REDACTED]

Best regards

[REDACTED]  
President Hydrogen Europe  
Strategic Hydrogen Leader- MICHELIN  
[REDACTED]
