

BTO – Meeting cabinet Gabriel (and DG CONNECT) with MOBIVIA – 08.12.2017

BTO - Meeting cabinet Gabriel (and DG CONNECT) with MOBIVIA - 08.12.2017

Present:

Mobivia president

+ consultant

Alina Ujupan

 (note taker)

Topics for discussion :

Mobilivia regroups several brands of repair and maintenance activities such as Midas, Auto 5, ATU, Norauto. They also engage their activities to new services based on data analytics . Examples are car sharing ecodriving, connected bikes sharing, valet parking, collaborative delivery of goods

Issue : access to data ring-fenced by OEM ; prevents the development of new services

Position: wish to access data for an equal level playing field in terms of competition

Operational conclusions : Provide electronic version of presentation and position paper + detailed evidence of lack of access; and also possible technical solutions
