---

Dear Commissioner Malmström,

Due to the fact that that forests play a great role in the Paris Agreement and implementation of the EU's 2030 Climate and Energy Framework, the Nordic Family Forest Owners wish to bring to your attention our views and main concerns. Evidently, policies developed at EU level have an impact on our members, forest owners in Nordic countries. Please find attached our joint letter influenced by the COM(2016) 479 proposal on inclusion of greenhouse gas emissions and removals from land use, land use change and forestry to the 2030 climate and energy framework and the upcoming Commission proposal on solid biomass sustainability policy.

Thank you for taking our concerns into consideration and please do not hesitate to share this letter within the Commission. We would be pleased to meet and discuss these topics at your convenience.

On behalf of the Nordic Family Forest Owners,

Yours sincerely,

[REDACTED]
