There are many Digital Single Market areas in which we believe we can contribute in the coming months including through our insight in innovation and our focus on customer service such as data flows, electronic communications review, copyright reforms, audio-visual, and cloud computing.

As a long-term investor and significant employer in Europe, with more than 40.000 employees in the EU, we look forward to supporting the Commission in fostering innovation, growth, employment and investment in Europe. We are hosting an event on the 26th of May in Brussels with key policymakers and representatives of the private sector, where we will highlight the important role of our marketplace to stimulate growth and jobs for SMEs in Europe.

I would welcome the opportunity for a meeting to discuss how Amazon can further contribute to strengthening the Digital Single Market.

I look forward to your response,
