1.6. Comments:

The external borders referred to above are Germany's Schengen external borders.

Adaptation of the data systems to allow for the separate States of "Serbia" and "Montenegro" will take place when the system is changed as from 2007.

The high figures for persons refused entry at Germany's external borders in the summer months became relatively more normal and decreased by more than 14% in October. The exceptionally high proportion of Moroccan nationals was, however, striking, as the latter for the first time took fifth place among those refused entry.

Instances of unauthorised entry detected at the external borders were on the increase again. The highest rates of increase could be noted with Iraqis at the land as well as air borders and with Ukrainians at the land borders. Chinese nationals once again ranked top ahead of the Iraqis at German airport posts.

In the case of asylum applications within Germany, the Iraqi and Colombian nationalities showed the highest rates of increase. The large number of Colombians was particularly striking.

1.6. Comments

The external borders referred to above are Germany's Schengen external borders.

Adaptation of the data systems to allow for the separate States of "Serbia" and "Montenegro" will take place when the system is changed as from 2007. Separate figures were made available as part of the information on asylum numbers from the Federal Office for Migration and Refugees (see 1.4.).

The high figures for persons refused entry at Germany's external borders of the summer months continued to fall in November and once again decreased by almost 17% in relation to October. The numerous detections of Romanians at the land external borders (particularly at the German-Czech border) and of Russian nationals attempting to enter by air were striking in this connection.

Instances of unauthorised entry detected at the external borders decreased towards November. Increases were nevertheless noted in the case of nationals from Serbia and Montenegro at the land borders and of Brazilians at the air borders, at which Chinese nationals also were again well represented.

In the case of asylum applications within Germany, Iraqi nationals again showed the highest rates of increase in November and also took first place in German asylum statistics. As in October, the number of asylum applications from Colombians was also unusually high. The reason for these high rates of increase could be the planned introduction of a transit visa requirement for Colombians in Germany.

## General trend of refusals:

The figures of refusals increased in November 2006 as compared to the figures of October 2006. The Romanian (74% of refusals were carried out there), the Ukrainian (11%) and the Austrian (7%) border sections were the most active ones with respect to refusals in the analysed period. The main refused nationalities were Romanian, Ukrainian, Serbian-Montenegrin and Bulgarian nationals, similarly to the previous months.

### Illegal aliens apprehended:

There were 1399 illegal aliens apprehended, which figure shows a 10% decrease in November 2006 compared to the previous month. Most of the illegal migrants were detected at the Romanian (42% of total apprehensions) and at the Austrian (22% of total) border sections. **NOT DECLASSIFIED**

### General trend of illegal border crossings (IBC):

1.6. Comments

**In November 2006**, refusals of entry decreased by 45 % in comparison with the same period in 2005. The leading nationality was Ukrainian which is understandable as this is the only adjacent third country. We assess the situation as favourable in comparison with the same period of year 2005. Decrease is evident, there is 157% difference.

In the area of illegal migration to the Slovak Republic, is constant situation as in comparison with October 2006, but in comparison with November 2005 decreased by 40%. The leading nationality of illegal migrants was Moldovian.

The number of asylum seekers decreased by 19% in comparison with the same period 2005.

Nationalities of asylum seekers figured the same as in comparison with the same period 2005.

The decreasing tendency in expulsion is directly connected with decreasing tendency of illegal migration through the territory of Slovakia in previous year.

1.6. Comments

Chinese nationals continue to dominate the table in relation to the number of asylum applications submitted at the UK frontier in spite of a decrease of one-third from last month's figures. Afghan nationals have replaced Eritrean nationals during November in relation to asylum claims within the UK borders with a rise of some 31% in applications from last month whilst Eritrean applications within the UK borders dropped by some 33% from last month. The number of Brazilian nationals refused entry at the frontier dropped by 24% from last month's figures, despite this they continue to be placed first in the table. Nigerians continue to account for the highest number of forged documents submitted on arrival.

#### 1.6. Comments

In the reporting period (1 - 30 November 2006) the number of refused aliens went down by 30% compared to the same period in 2005.

Top five of refused aliens remained stable in terms of nationality.

The main reasons for refusal were as follows: without visas, without passport or without the necessary financial resources.

In the field of asylum the reporting period saw an increase in the number of submitted asylum applications. There is a stable tendency of having the largest number of asylum applicants from Afghanistan, part of them being minors and unaccompanied. Untypical asylum seekers appeared from Serbia, Sudan and Russia but their number was insignificant. Many of the asylum applicants establish contacts with smugglers, who attempt to organise their facilitation to Western Europe.

1.6. Comments

During the period under consideration there was a big increase as regards the number of illegal aliens apprehended (44%) and the number of returnees (128%) in relation to the previous month.

This general trend is also noticeable in comparison to the same period in 2005 (6% respectively 22%). Still nationals of Moldova and Turkey are most involved in illegal migration, 60% out of the total number of the illegals apprehended and 79% of the expulsions.

There was also an increase in the number of applications for asylum within the national territory. Most of the requests were from Somali (18) and Iraqi nationals (9).

As regards refusals of entry, the highest figures came this period from Moldavian and Ukrainian nationals (75% respectively 16%).
