K110 IKE (Vapour Smok-e)

K. Kartali 110

38221, Volos

Greece

Dear Sir or Madame,

We are writing to express our concern regarding the national legislation amendment for which the Greek Ministry of Health on the 19th of February 2019 initiated the procedures in the Greek Parliament regarding the requirements of placing non-nicotine containing e-liquids on the Greek Market and the prohibition of the placing of other chemical products. The legislation was notified to TRIS (Number: 2019/80/GR), on 25th of February 2019, but stakeholders cannot contribute, since there is no consultation available.

It is our opinion that the legislation amendment includes various provisions that hinder the free movement of goods in the single market and therefore a consultation should be conducted for stakeholder to express their opinion.

The public health issues that are claimed by the Greek Ministry of Health as a justification for using the TRIS emergency procedure are clearly a pretense, since the products that are affected by the legislation amendment are already placed on European market in compliance with the Regulation (EC) 1272/2008 and (EC) 1907/2006.

The emergency procedure should not apply in this case, since there is no actual public health issue and so far, there has been no consultation at all between stakeholders on the legislation amendment.

Kind regards,

Vapour Smok-e
K110 I.K.E.
