RE: SUP directive: request for a meeting

Dear Mr Pellegrini,

Do you have any news?

Regards,

Dear [REDACTED]

At the stakeholder meeting of 25 February (afternoon session), it appeared that there are diverging opinions as to whether the disposal of plastic-containing wet wipes through the toilet is covered by the provisions of article 8.3 of the SUP directive.

As this question is of the utmost importance to waste water operators, we would be obliged if you could meet with us in order to weigh up all the arguments. Excluding the sewer network would mean that the directive would practically not address wet wipes and, hence, not trigger tangible changes in this market segment. We agree however that the directive's wording is ambiguous on this point.

We would be obliged if you could propose some time slots that would suit you. Thank you very much.

Regards,

●
