**Subject:** Please forward to Energy Commissioner Kadri Simson / ahead of our meeting on Tuesday / concrete political proposals to foster offshore windpower on EU-level  
**Attachments:** 20200525\_Topics for the European Offshore Wind Agenda final .pdf

Dear Commissioner, dear Ms. Simson,

I am very much looking forward to meet you on Tuesday in the video call with the Roundtable for Europe's Energy Future.

We have heard from your cabinet that you are currently especially interested in ideas how to foster the role out of offshore wind energy on the European level, also with a view on the upcoming offshore wind strategy.

Therefore I do not want to miss to share with you our latest TenneT-paper on this issue before we meet on Tuesday. It lists a number of concrete and specific political and regulatory actions that could be taken from now on, also during the German council presidency in the second half of 2020, to pave the way for a truly international offshore wind energy system. The paper includes concrete measures that could be taken by the Commission, the DG Energy and the North Sea Energy Cooperation.

We will send the paper also to the DG Energy but I wanted to make sure that you are informed first hand.

In case that we at TenneT can be helpful in any other way I would be happy to hear from you.

Met vriendelijke groeten / Kind regards / Mit freundlichen Grüßen,
