Subject: Comment on planned COM Communication on "Chemicals strategy for sustainability"

Dear all,

With the draft communication "Chemicals strategy for sustainability - Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee of the Regions", the European Commission recognises the importance of substances for the European economy, in particular their important role in achieving the current well-being and comfort of our modern society. At the same time, it aims to ensure that exposure to substances classified as toxic or environmentally hazardous are avoided. The Commission refers to the comprehensive legal framework for chemicals in the EU, while stressing that the current framework is not sufficient to bring about the necessary conversion to production and use of sustainable substances and to promote the substitution of hazardous substances.

The German Steel Federation welcomes the Commission's efforts to strengthen substance related health and environmental protection and would like to contribute with the attached comment to the ongoing discussion.

Should you have any questions, please do not hesitate to contact us and we are looking forward to staying in touch with you.

Best regards
