**Subject:** EDiMA shares proposal for Online Responsibility Framework

Dear Mr Viola,

I am writing to you on behalf of [EDiMA](#), the European trade association representing the platform economy, to share with you our proposal for [a new Online Responsibility Framework](#), in which we set out our vision as to how internet companies and stakeholders can tackle illegal content and address concerns in the online ecosystem.

We are conscious that policy makers are reflecting on the evolving nature of the online ecosystem and the rules which underpin it. In this regard, we have been closely following the latest developments around the Commission's important discussion on the new "Digital Services Act" (DSA) and the future of the e-Commerce Directive, and we are eager to use our experience and insight to be a constructive driver of these discussions in Brussels.

As such, we hope that the attached paper can be a positive contribution to a forward-looking and inclusive conversation in the new EU mandate. I would furthermore like to enquire as to whether you would be interested in meeting with EDiMA, to learn more about our position on online responsibility and share your views on this initiative?

I look forward to engaging with you on this important work, and we remain at your disposal should you have any questions.

Kind Regards,

[REDACTED]
