

Call with Computer & Communication Industry Association (CCIA) Europe members on DSA package, 16 June 2020

Participants: CCIA Europe: [redacted]
[redacted]
[redacted] **Google:** [redacted]
[redacted] **Wolt:** [redacted] **Uber:** [redacted]
[redacted] **Facebook:** [redacted]
[redacted] **eBay:** [redacted] **Amazon:** [redacted]
[redacted] **Cloudflare:** [redacted] **British Telecom:** [redacted] **CNECT F2:** [redacted]
[redacted]

personal data

CCIA explained they already provided a position paper on DSA package and asked the Commission to elaborate on it

COM [redacted]
[redacted]
[redacted]

CCIA shortly elaborated their position: ECD successful piece of legislation; members are aligned with a horizontal framework. Three main elements: 1. Accountability/liability that works for everybody – flexibility for those that wants to do more. Simple example – an automated tool; transparency – what for should it work. 2. In touch with NRAs on processes to tackle illegal content online, as they believe that large platforms should not do it. Also harmonised procedure on N&A would be helpful. 3. European values should be underlined in the text – e.g. ad GDPR. Asked about recommendation of GROW on counterfeit products – this should be a part of the DSA?

decision-making
process

COM work around MoU on counterfeit products should be a separate but complementary initiative, exporting of good rules – [redacted]

Cloudflare asked about the report on hosting services – timeline, rough content

Facebook ex ante initiatives and NCT – complementary?

COM some procedural differences; P2B always claimed to be a first step together with the Observatory. Lot of discussion around data operability/interoperability, and this was also connected to e.g. copyright. A side reason for this is to separate ECD and market power parts. But this may not be obvious from your document at a first glance. Happy to receive your counter arguments;

[redacted]
[redacted]
[redacted]
[redacted]

CCIA infrastructure access etc. – happy to continue in discussion. GROW transparency guidelines – in touch with them as well. Increased dependency and bargaining power, some market failure around this – can you raised some other specific failures?

COM reluctant to give details on this as this is a work in progress but COM guidelines useful in this regard for some overview; work is going behind them though. Some complaints in platforms world are not real; good to schedule more in-depth discussion once we are further. [redacted]
[redacted]

[REDACTED]

[REDACTED]

[REDACTED]

CCIA important to hear if the initiative is consumer or procompetitive oriented; and also multi-sided, happy to talk on this later in more detail. Open to provide data on some of their members
