BTO Uber, 17/06/2020

Uber: [REDACTED]

COM: [REDACTED]

- Uber asked for a meeting to discuss the open public consultation. The following were the main discussion topics:

- o **Differentiation between the services provided by platforms and these provided by the underlying services providers:** Uber considers that the DSA should provide clarity regarding the different services and clarify existing case-law.

- o **Good Samaritan clause:** Uber considers that the Good Samaritan clause could be extended to actions platforms take to optimise the provision of services provided by the underlying services providers. These actions benefit the final consumer; hence, further clarity regarding their relationship with the platforms' liability would be welcome.

- o **Data:** Uber stressed that there should be a coherent approach for data sharing and reporting in the DSA, the ex ante tool and the EU Data Strategy.

- o **Future of work:** Uber enquired whether the DSA will include specific provisions on platform workers.

- o **Ex ante tool:** Uber enquired what the relationship between the P2B regulation will be and the new instrument. Uber was also interested in knowing more about the scope of the instrument and the potential criteria the Commission is currently considering.
