Subject: Request for information | 2019-0373

Dear [REDACTED],

I hope this email finds you very well. I'm writing you regarding the informal consultation on the European Parliament's 'efficient printing' system (EDPS case file 2019-0373).

We thank you for the additional information you provided by email on 17/04/2019.

After the analysis of the documentation sent, we kindly ask you to clarify the following four points:

1. Anonymous data

The personal data processing record states on page 3 that '[a]nonymised data will be used for statistical purposes in order to have a better overview of the paper and toner consumption'. Could you please provide additional details on what kind of anonymous data will you collect for statistical purposes and why you deem that such data should be considered anonymous. Is it, for example, 800 pages, toner consumption 50% on week 15?

2. Complete diagram of the data flow

If available, could you please provide us with a complete diagram of the dataflow of the 'efficient printing' system.

3. Data retention period

The personal data processing record states on page 5 that '[e]ncrypted records in databases (stored on the European Parliament servers) are generated during the processing operations. Personal data will be retained for a maximum of 18 months from the moment they are collected'. Could you please clarify the need for this data retention and what kind of personal data will be retained.

4. Data encryption

You mention the type of encryption for the HDD data. Do you use the same encryption method (AES256-bit) for the other encrypted system?

We would appreciate if you could send us the information requested above by 11 June.

Thank you in advance for your collaboration.

Kind regards,

[REDACTED]
