

European  
Commission

# Conclusions

(DG SANTE F2)

*Outcome – change the Standard model form in Art 112 of OCR (IA)*

*OUTPUT – A document for comment on guidance- put in best practice/ effective actions.*

*Scope - tick to pigs broilers (and cattle) ... at least for now.*

*Actions taken can illustrate SEDR.*

*DK and NO send protocols for Nordic Council (Body condition, cleanliness, lameness, lesions correspondence to EU requirements – Farmers liked these inspections!*

*DK campaigns*

*625/2017 possibility of "indicators" and EURCAW*

- Plenty of indicators (milk hygiene, rendering plant SH).*
- FPD – Stocking rate, air, thermal comfort, floor bedding, outdoor access (OIE).*
- When using indicators training/harmonisation needed.*
- Establish indicators for 98/58 and 2008/120 requirements.*

***horizontal Indicators**– fitness at SH/level of rejections/ mortality at farm level/ rendering plant). Also the vet visit for health surveillance (AH law and 90/425).*

*Need to define indicator and database to capture this monitoring.*

## More examples

*Poultry – CDMR – PT trigger levels for this indicator and procedures to ask for an AP and for planning to target farms for inspection.*

*Advice to farmer from OV on what the PM results mean.*

- *854 – FI example: x2 abscess, tail damage, arthritis*

*CIRCABC – for sharing of docs*

*Tbc 23-24/10 further meeting*

- *Setting objectives- is there a bottom up system or top down or both (see "other data" photo)?*
- *Are strategic objectives broken down into operational objectives?*
- *Planning based on these objectives? To what extent is analysis of previous controls included in the planning process?*
- *How do you become aware of animal welfare problems to include in risks?*
- *Does the planning cover procedures training (e.g. adapted to new objectives)?*
- *Are controls always based on these objectives?*

- *To what extent are AW indicators used?*
- *How do you measure the outcome of official controls: compliance rates or more than this?*
- *Do you conclude on whether resources were sufficient to implement this plan?*
- *Do you feedback to inspectors on the analysis of controls? Do they contribute to planning?*
- *How does the analysis contribute towards development and continual improvement of controls or results in "other official activities" (ref).*
- *Objectives for "integrated controls" and are they planned differently than controls only on animal welfare?*

# Indicators needed!

*Relevant*  
*Acceptable*  
*Credible*  
*Easy and*  
*Robust.*
