**Subject:** Final report "International comparison COVID-19 testing and tracing strategies"  
**Attachments:** International comparison of COVID-19 testing and contact tracing strategies.pdf

Dear Members of the Health Security Committee,  
Dear Colleagues,

Attached you will find a comparative study of testing & tracing strategies in [REDACTED], [REDACTED], prepared with colleagues from Sciensano, the Belgian healthcare knowledge centre, and the cooperation of other countries (also several HSC representatives).

Belgium underlines that this is for mutual learning and comparing, not to identify the 'best' system or to criticize approaches.

Kind regards,

HSC Secretariat
