--	---

Main issues discussed

The representatives of the European Public Real Estate Association (EPRA) briefly presented to the Commission services their position paper of 4th March on the current situation of the cross-border property investments within the European Union and more specifically to the situation of listed European Real Estate Investment Trusts (REITs), which EPRA believes should be one of the areas where further action is needed to enable cross-border investments and facilitate the growth of the EU's listed REITs market.

FISMA explained its current work on an Investment Initiative to support and facilitate EU cross-border investment and invited EPRA to participate in the ongoing public consultation that has been launched after the publication of the inception impact assessment.

FISMA explained the current work on CMU and more specifically the work of the High Level Forum and its targeted recommendations that will be considered for the new CMU action plan.

FISMA stands ready to assess further input of EPRA following this call and to continue the discussion.
