Subject: FW: Request for a meeting with [REDACTED] (Solar Impulse)

Dear [REDACTED]

Can we add this invite for the discussion to the table (so we have only one channel)? I already warned that the agenda on those days is very packed.

Do we need to register the request?

Thanks,
Kitti

Subject: Request for a meeting with [REDACTED] (Solar Impulse)

Hi Kitti !

First of all, let me congratulate you on your new position! I am extremely happy for you!

I am contacting you on behalf of [REDACTED]

As you know, [REDACTED] decided he would put his notoriety at the service of innovations that bring a positive value for the protection of the environment and fight against climate change. He engaged into a new challenge, gathering 1000 solutions that demonstrate having a profitable business plan and have a positive impact on environment. To that end and to ensure credibility, he created the label. So far, we already have more than 300 solutions labeled.

Over the past years, we have been working extensively (thanks to a big support of the VP Sefcovic & DG ENER) with the European Commission with two objectives:

- Have as much as possible EU solutions within our portfolio
- Engage EU staff and EU evaluators into the labellisation process

Both have been very positive. However, nothing could happen with the highest political support. Given the involvement of your Commissioner in implementing the Green deal, we very would like to exchange with you about future ways of collaboration.

[REDACTED] will be in Bxl on **18 & 19 February**. He very much would like to have a meeting with your Commissioner (they already met at COP, but only briefly, no

genuine exchange on the substance). If you like it, you and I could meet in advance to prepare for this meeting.

I very much look forward reading you,
