Subject: Eurogypsum comments on climate mitigation & adaptation criteria (taxonomy)

Dear [REDACTED],

First of all, please let me convey my very best wishes to you and your team! I'm sure we will have plenty of opportunities to interact this year within the RMSG. I also hope 2021 gives us all soon a possibility to meet each other again outside of videoconferencing systems.

I just wanted to share with you our Eurogypsum comments on the recent Commission's consultation regarding **taxonomy criteria for climate change mitigation and adaptation**. I know that you are not leading on this but I thought it would be important to share our concerns about important elements missing in this far-reaching initiative, leading to an inconsistent and unfair treatment of activities enabling energy efficiency in buildings, e.g. the consideration of bricks and tiles manufacturing – but not plaster product manufacturing, against all evidence regarding relative climate impacts. We are also working in parallel to provide possible input into the criteria under development regarding other environmental objectives of mining/quarrying and processing activities, closer to your team's remit, and will keep you informed in due time.

As usual, I'm available for any follow-up questions or any further information request you or your colleagues may have on this.

Many thanks in advance for your attention and, again, my very best wishes for 2021!

Kind regards,

[REDACTED]
