---

Dear Ms Chirico,

I am contacting you again on behalf of my client Suez, who would like to share with you two major contributions of the company towards the EU's climate neutrality goal.

The European Green Deal and the EU's taxonomy framework are powerful policy drivers for the operations of SUEZ in Europe and fully aligned with the corporate strategy moving towards 2030.

Suez has **targeted three policy priorities that have the biggest potential to accelerate the effective implementation and achievement of the Green Deal:**

- **Water quality** – fighting pollution in the environment while tapping the potential of municipal water;
- **Industrial water efficiency** – improving industrial water footprint for long-term competitiveness;
- **Air quality** – improving ambient air to positively impact quality of life;

In addition, **Suez recently announced** (one year ahead of its legal obligation) **that 74% of its 2020 revenue qualifies under the EU taxonomy reference framework** for sustainable business activities.

Suez is of course more than happy to answer any questions you may have on these documents.

Sincerely,

[REDACTED]
