Dear [redacted],

Dear [redacted]

Dear [redacted]

Dear [redacted],

Dear [redacted],

Dear [redacted],

As a follow-up to our exchanges, I have attached our feedback, submitted today, on the draft Delegated Regulation setting the setting the climate change mitigation and adaptation criteria. As explained in the attached document, we consider it particularly important that the final text includes White cement (in addition to grey cement) with the corresponding metrics and thresholds, and also believe that it should recognise the possibility of CO2 utilisation (in addition to storage).

In addition, I attach again to this e-mail our reaction to the Zero Waste Europe paper on RDF as the organisation has made the same claims in a more recent submission. As mentioned previously, we strongly disagree with the claims made in that paper, which we believe are factually incorrect and not based on scientific grounds.

Best regards,

[redacted]
