Dear [REDACTED],  
Thank you again for the meeting we had on March 19th.  
Allow us to follow-up with the annexed two-pager.  
I hope you'll find it usefull, and we remain at your service to provide more background information should you wish so. Actually, we would even appreciate the chance of elaborating further on how our sector could contribute to the 2050 decarbonisation objectives.  
As we also had a call with Katie Power from the McGuinness cabinet, I will also share the two-pager for information with her.  
Best regards,

[REDACTED]

Dear [REDACTED],  
We could meet later this month if necessary. I won't be able to comment on what's in the first Delegated Acts, now being finalised for adoption in April.  
Regards,  
[REDACTED]

**Subject:** H2, O2 and the taxonomy

Dear [REDACTED]

EIGA, as you may know, represents the vast majority of European companies producing industrial, medical and food gases, including hydrogen, oxygen and nitrogen.

EIGA members are also playing an active role in contributing to Europe's 2050 decarbonisation objectives, by providing products that are helping to reduce emissions across a number of intensive industrial activities, including the steel and chemical industries.

I would be grateful for the opportunity to meet (virtually) to exchange views with you and your colleagues on the continued development of the EU Taxonomy.

We very much hope a meeting could be possible, and look forward to exploring a date which is convenient over the coming days.

Kind regards,

[REDACTED]  
[REDACTED]
