Re: Draft technical specs amendment

Sí, eso es.

Serían aceptables 3/3, 4/4, ... n/n

Si esto se convierte en un ciclo de vacunación periódico (p.ej. anual, o semestral para algunos colectivos), parece la manera más sencilla de registrarla.

Saludos,

De

Asunto: Re: Draft technical specs amendment

In general, we support the proposed document, and do not believe that any delay is needed in its proposal for adoption.

Regarding pages 4-6, our only suggestion is that semantics for coding experimental COVID-19 vaccines used in clinical trials should be explicitly supported in vaccination DCCs. If valid DCCs (with interoperable and internationally recognized semantics) cannot be issued to participants of COVID-19 clinical trials, this creates a discriminatory situation for these persons, and it may become increasingly harder to find volunteers for these trials in the EU/EEE.

Please note that, on page 7 of the proposed document, ISO 3166 Country Codes, available as a value set defined in FHIR (<http://hl7.org/fhir/ValueSet-iso3166-1-2.xml>) do not include Kosovo (which we find reasonable, since not all EU MS recognize this territory as an independent country), and the descriptor for country code "TW" is "Taiwan, Province of China".

Best regards,
