**Subject:** EUBOF2.0: Status Update on "Energy Efficiency of Blockchain Technologies" Thematic Report  
**Date:** jeudi 29 juillet 2021 08:02:44

---

Dear [REDACTED] Dear [REDACTED]

with regards to the Energy Efficiency report, Yiannis has provided the following information regarding status and timeline:

- We have contacted the authors of a very interesting article that addresses exactly the comments raised by the commission. The article title is "[The Energy Consumption of Blockchain Technology: Beyond Myth](#)". We are expecting their contributions by Aug 13, given the fact that some of them are on currently on holidays.
- As agreed, we have also reached out, to various enterprise grade blockchain providers on the aspect of the energy consumption of their blockchains and underlying consensus mechanisms. The outcome is as follows:
  - Energy Web: Contributions received.
  - Tolar HashNet: Contribution received.
  - R3 Corda: Waiting for contribution (Aug 13)

Given the fact that most people are out of office in July, thus the delay in receiving their contributions. Essentially, this means that the overall contributions will be integrated in the report in the third week of August and then shared with you for your final review and sign off and we can either publish in the final week of August or early in September.

We apologise for this delay, but as you can understand, to address the comments, we need to receive inputs and insights from those that have available data to share.

We remain at your disposal,

Kind regards

[REDACTED]
