Dear Sir,

Thank you very much for sharing your material with me. I will read it with interest and it will inform our reflections on the next steps. We will not hesitate to contact you for any follow up question.

Best Regards,

**Riccardo Maggi**  
Member of Cabinet

**European Commission**  
**Cabinet of the Executive Vice President**  
**For a European Green Deal**  
**Frans Timmermans**

**Subject:** RePower EU - Making the Energy Efficiency Goals a Reality

Dear [REDACTED]

I just wanted to follow-up on the email of my colleague [REDACTED] from yesterday.

Given the urgency of the current crisis, we decided to quickly model – based on our data from real performance projects in Europe – what it really means to deliver 38 bcm of gas reduction from energy efficiency renovations (see attached).

Topline, we are looking at 80 million renovations between now and 2030 and a needed workforce of around 350,000 people.

This is a major undertaking but not impossible if government and the private sector work together to deliver this.

Our view is that the way to make this real is to urgently implement energy efficiency

purchase agreements, as the Commission proposed in the Renovation Wave Communication.

Such an approach will provide business with the needed certainty to aggressively scale capability whilst providing certainty to government that the billions of cubic meters of gas are actually taken out of the system.

We presented the attached paper to Karlis Goldstein yesterday but we wanted to also share it with you.

If you had time for a quick coffee in the coming days, it would be good to go through this and understand your perspective.

Regards,

Knauf Energy Solutions
