Subject: Third Joint Industry Letter on Green Hydrogen / Delegated Act RED II
Attachments: 20220324_DA RED II Green Hydrogen_Third Joint Industry Letter.pdf

Importance: High

Dear Mr Seibert, Mr Samsom, Mr Grassi, Mr Moutarlier and Mr Götz,
Dear Ms Juul- Jørgensen, Ms Wörsdörfer, Ms Jorna, Mr Petriccione and Mr Hololei,

In light of the current dramatic developments, we fully support the European Commission's efforts and we welcome the REPowerEU Communication. It rightly underlines the necessity for a fast ramp-up of domestic renewable hydrogen production and introduces the "hydrogen accelerator" as one of the cornerstones of the future EU energy and industrial policy.

For an effective "hydrogen accelerator", the upcoming Delegated Act on criteria for renewable hydrogen (RFNBOs, Art. 27.3 RED II) is of crucial importance. Therefore, please find herewith a **third joint industry letter** on this matter. It follows up on our CEO letter to Commission President von der Leyen from 9th September 2021 and our second joint industry letter from 9th of December 2021. This third letter is carried by the European Affairs / Government representatives of **23 undersigning companies**.

We all stand ready to contribute to a quick and well-designed solution for the Delegated Act and would be happy to engage in further exchanges with you.

Kind regards,

On behalf of the colleagues of the 23 undersigning companies

Corinna Grajetzky, RWE Viola Rocher, EnBW Benedikt Herges, Siemens Energy Vladimir Mijatovic, VERBUND

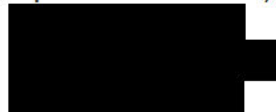

Corinna Grajetzky
