**Subject:** Follow up DG GROW - EIT RawMaterials meeting 15 December 2022

Dear [REDACTED],

Following our good exchange yesterday on various RM related topics I would like to come back on the point regarding our strategic partnership activities and the necessity to work together following "the Team EUROPE spirit". Us bringing the policy perspective including the MS view and you channelling and mobilising potential EU industrial stakeholders to achieve our overall goal of securing /strengthening supply of CRMs to the EU.

As you know there is a number of on-going partnership dialogues, I shortly presented yesterday, and I agree that a good planning is essential to keep our promises and commitments (Roadmaps) with our international partners. Therefore, we will prepare a 2023 partnership activity plan with indicated type of possible EIT RM / ERMA engagement and I would like you to assess it with your team and come back to us with your proposal. It is clear the plan needs to take into account policy urgencies under which we often operate e.g. [REDACTED]

Furthermore, I propose to attach the 2023 partnership activity plan to the updated KPIs for 2023. With the respect to KPIs 2023 I encourage you to send us your proposal that could be the base of our next meeting in ca end of January 2023.

Let me conclude by wishing you and your team a restful Christmas break and a prosperous new year 2023!!
