**Subject:** Quick debrief on meeting SGI on draft Interpretative Guidelines for PSO Regulation

Dear all,

Today I met [SGI Europe](#), an EU cross-sectoral social partner, representing providers of services of general interest, amongst others also transport, to discuss their comments on the Interpretative Guidelines.

The comments from SGI were very similar to those submitted by Member States and PSO operators (ex ante assessment of demand, SNCM, assessment of commercial offer, etc...). I explained how COM intends to take into account these comments, clarified that, in all likelihood, there will not be a second consultation, nor a publication of the revised text before adoption, and informed them that we intend to adopt the revised text by the end of the year.

(Nothing new under the sun...)
