

# BTO - Meeting with OpenAI on 13.06.2022

**Title:** Discussion with OpenAI about the proposed Artificial Intelligence Act and its scope with regard to general-purpose AI systems

**Date:** 13.06.2022, 17:30 - 18:30 h

**Participants:**

Open AI: [REDACTED]  
EC CNECT: [REDACTED]; EC JRC: [REDACTED]

**Main Topics Discussed:**

OpenAI is an artificial intelligence (AI) research laboratory consisting of the for-profit corporation OpenAI LP and its parent company, the non-profit OpenAI Inc. The company conducts research in the field of AI with the stated goal of promoting and developing friendly AI in a way that benefits humanity as a whole. The main points discussed were:

- The scope of the AI Act in terms of general purpose AI systems and the perspective of OpenAI as a provider of general purpose AI systems, in particular with regard to measures to ensure such systems' reliability as well as future compliance.
- [REDACTED]
- The GPT-3 model of OpenAI for understanding and generating natural language and the related use of Application Programming Interface (API) vs. open source research models, in particular in the context of the future applicability of the AI Act.
- A joint statement of OpenAI and other AI providers on a set of best practices applicable to organizations developing or deploying large language models.
