Subject: Methane Proposal - New Briefing: The Transatlantic Petrochemical Trade is Undermining EU's Climate & Plastics Policies

Dear Stefano, Barbara,

I am writing to share a new briefing and analysis from the Center for International Environmental Law and Rethink Plastic Alliance, [The Transatlantic Petrochemical Trade is Undermining Europe's Climate & Plastics Policies](#). This briefing outlines and explains the growing role of US fracked feedstocks in European plastics production, and the relevance of this burgeoning supply chain to the forthcoming EU Methane Regulation, as well as broader EU climate and plastics policy.

We hope this briefing can be useful as the Commission finalizes its proposal for the Methane Regulation. If you have any questions, please do not hesitate to reach out to me at sfexx@xxxx.xxx or contact Rossella Recupero at rrecupero@ciel.org.

Thank you,

[REDACTED]
