Subject: RE: IOGP Europe member projects contributing to decarbonisation, emissions reduction, and renewable energies

Dear [Name],

Many thanks for your email and suggestion for a follow-up meeting.

As you have seen, we have been very busy at COP28 with the official launch of the Global Pledge on tripling Renewables and doubling Energy Efficiency. We are now working on the follow-up as well as preparation of the Belgian Presidency and finalisation of the remaining legislative files; i.e. Electricity Market Design and Net Zero Industry Act.

After discussions, we propose that you contact @ec.europa.eu from ENER and @ec.europa.eu from CLIMA to organise such a meeting in January. They will make sure to bring the relevant colleagues to discuss below topics and clarify next steps so as to bring our conversation further.

Best regards,

Ditte Juul Jørgensen  
Director-General

Importance: High

Dear Ditte, dear Kurt,

As agreed during our meeting, please find enclosed IOGP Europe members’ projects contributing to decarbonisation, emissions reduction, and renewable energies in the EU. The purpose of the document is to exemplify our commitment to the EU climate neutrality objective.

Please note that this list of projects is certainly not exhaustive. However, I hope that you will find it useful in view of the forthcoming COP28.

As discussed, we would be pleased to arrange for another meeting to discuss the follow up of COP 28, the finalization of NZIA negotiations and the 2040 target. On this occasion, we could also present to you the conclusions and the recommendations of the Rystad Energy 2023 Edition on "How Europe’s natural gas supplies can be rebalanced".

With my best regards,
