Message from [REDACTED] from country.UK (?)
This is an Access to Documents request under REGULATION (EC) No 1049/2001

Please would you provide me with:

1) an inventory of all documents pertaining to the Commission conception and approval, from earliest stages, of the FP7 A4Cloud project ref: 317550 (http://cordis.europa.eu/projects/rcn/106028_en.html), including emails and correspondence with private parties and other DGs. The inventory should describe the subject matter and number of pages of each document.

The published preparatory materials for the project do not include the statement which now appears on the A4Cloud website (<http://www.a4cloud.eu/scope>) "Government surveillance, including government acquisition of data from cloud service providers, is outside the scope of this project, except where it relates specifically to a data protection law accountability mechanism"

2) when did the Commission become aware of this restriction of scope, and in which document does this first appear?

3) Any documents (including emails and correspondence) discussing whether Government surveillance is or is not in scope, and the Commission's understanding of the formulation "except where it relates specifically to a data protection law accountability mechanism".

4) Documents which list the EU official and Expert assessors of the proposal, and their evaluation reports

regards

[REDACTED]
