Subject: ARES(2012)1080896 - Indirect landuse change (ILUC) and European biofuels promotion

Dear [REDACTED],

Dear [REDACTED],

It is clearly the responsibility of AGRI to answer the concerns expressed in the letter of COPA COGECA. Biofuel research is not even mentioned. The only contribution we can make is the following:

"EU research and innovation strategy in the area of biofuels with its clear (and indeed, since FP7, exclusive) focus on 2nd generation biofuels, would help the implementation of the proposed directive".

I hope this can be of use. This contribution will be put in ARES tomorrow. [REDACTED] is the person in charge in RTD-K3

[REDACTED]
